WOOD BURNING HEATERS

# wood burning sauna heaters

The design of our high-quality wood burning heaters is a combination of a thorough knowledge of sauna traditions, mastery of modern fuel economy and environmental issues, and the latest in engineering know-how. And last but not least, an eye for aesthetics is also important.

Over the years, we have developed the skill to incorporate the best aspects of traditional wood burning stoves into a modern and technologically advanced context. Helo wood burning sauna heaters have always been durable and made out of high-quality materials. Today, our heaters also provide the best operating efficiency available on the market, have very low emissions, and are pleasing to the eye. All the stoves in this brochure are also CE-marked.

HELO 20 PK

HELO 16 PK ES

HELO 20 PK VO

## ■ HELO PK HEATERS

The operating efficiency of our wood burning heaters is unrivaled, and the temperatures of the emitted flue gases are record-low. The efficient combustion is based on the skilled use of insulating and heat-retaining materials, optimisation of the sauna stones container, and above all Helo's efficient double combustion technology. Your heater will heat up quickly, economically and in an environmentally friendly manner.

All the heaters in this brochure allow continuous heating, they are CE-marked, and are equipped with an advanced double flame circulation system and a stylish furnace door of glass.

Our heaters that include a water tank allow you to adjust how rapidly the water heats up according to your preference. When installing the Helo 16 PK ES model equipped with a water tank at the front, you can choose on which side the tap of the of the heater will be, and whether the tap is left- or right-handed. Our larger Helo 20 PK heaters are available with a choice of water tanks either on the left or right side of the stove.

We also provide a comprehensive selection of chimneys, pipes, protective panels and a full range of accessories for safe and easy installation of your Helo heater.

***In addition to being CE compliant, the flue gas temperatures of Helo wood burning heaters have been measured separately, and a separate certificate with the measurement results of our heaters is available (SFS Standard 7011).***

Code	Model	Sauna volume, m <sup>3</sup>	Measurements (W x H x D), mm	Stones, kg	Water tank, l
289036	HELO 16 PK	8 - 16	390 x 440 x 706	25 - 30	-
289033	HELO 20 PK	13 - 20	390 x 470 x 730	35 - 40	-
289037	HELO 16 PK ES, water tank at the front	8 - 16	390 x 645 x 706	25 - 30	22
289034	HELO 20 PK VO, water tank on the right side	13 - 18	550 x 470 x 730	35 - 40	25
289035	HELO 20 PK VV, water tank on the left side	13 - 18	550 x 470 x 730	35 - 40	25

# the original finnish sauna experience

Helo Ltd has its roots deep in the authentic Finnish sauna tradition with its natural and healthy lifestyle. Helo was established in 1919 – as Karjalan Sähkö in the city of Viipuri – and our first prototype electric sauna heater was built in 1949.

Over the years, our product range has evolved to include a complete selection of sauna heaters for both private and commercial use. Today, you can easily find a Helo stove that feels just right for you, no matter what the size, shape or interior design style of your sauna is. Moreover, the same applies to your preferences regarding bathing temperature and climate – Helo is always there for you.

Our quality and craftsmanship express our deep respect to the Finnish sauna tradition. We warmly welcome you to experience the real sauna with us.
